Power Standard 1: Add/subtract on number line	Power Standard 2: Compute unit rate
What is the distance between 0 and —8? Use the number line to explain your answer.	If a proportional relationship is given by a description such as a person reads 2 ½ books in 22 ½ hours at a constant rate, what would be the unit rate? Show your thinking.
* 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1

Power Standard 3: Write in other forms	Power	Standard	4: Show prop	portion in equ	uations	
Rewrite the expression in standard form: $-3(1-8m-2n)$	Marty sold lem constant of pro					е
	Dayssold	1	2	3	4	
	Cups of lemonade	4	8	12	16	
Effort	Power Marty sold lem constant of pro	onade c	ver a fou		od. What is th	e
	D 11	1	2	3		
	Days sold	*		3	4	
	Cups of lemonade	4	8	12	16	
Answer	Cups of	100		1000	165.4	

Power Standard 5: Multiply rational numbers	Power Standard 6: Solve real world equations
Multiply. Show your thinking. $\frac{1}{2} \times -\frac{3}{4}$	Kevin is currently twice as old now as his brother. If Kevin was 8 years old 2 years ago, how old is Kevin's brother now?
Effort	Effort
Power Standard 5: Multiply rational numbers	Power Standard 6: Solve real world equations
Multiply. Show your thinking. $\frac{1}{2} \times -\frac{3}{4}$	Kevin is currently twice as old now as his brother. If Kevin was 8 years old 2 years ago, how old is Kevin's brother now?
Answer	Answer

Power Standard 7: Use order of operations	Power Standard 8: Solve real world problems
Write the number $\frac{10}{8}$ as a decimal using long division. Tell if the answer is a terminating or repeating decimal, and explain how you know.	Josh's grandmother lives 556.3 miles away. If he traveled 226.8 miles today, how many more miles does he need to travel to get to his grandma's house tomorrow? Show your thinking.
